COLLECTIONS of BULBS

Chosen to make an attractive and varied show in your garden, these 4 collections offer really remarkable value. Each bulb is a sound, clean, hand-picked specimen, and costs considerably less in collection than when purchased separately. Culture hints will be found under the names of the individual types elsewhere in this catalogue.

ACHIMENES

PLANT JULY TO OCTOBER.

Attractive pendulous growth, ideal for window-boxes or hanging baskets, producing pretty little trumpet flowers in shades of blue and purple with contrasting eye. The scaly, grub-like bulbs should be planted an inch or so deep; a dozen bulbs would be sufficient for a window-box 24 inches long. They like well made up soil, and warm moist conditions for Summer flowering. 6d. each, 5/- dozen.

AGAPANTHUS

(South African Lily)

PLANT ALL YEAR ROUND

POSTAGE EXTRA

Crown of beautiful flowers on stem 3 ft. long. Very effective in flower border. Grows well in any ordinary garden soil. Makes a good pot plant for verandah.

BLUE 1/- each; 11/- dozen
WHITE 1/- each; 11/- dozen

AGAPANTHUS

ALLIUM

PLANT FEBRUARY TO MAY

POST FREE

A decorative showy family of hardy Spring and Summer Flowering Bulbs. Any soil suits them; they require no particular care; bloom for a long time.

HERMETTI GRANDIFLORA. White; very fine. 3d. each; 2/- dozen; 13/- 100.

LUTEUM. Bright yellow flowers; last well when cut. 3d. each; 2/6 dozen.

ROSEUM. Pale rose in umbels. 3d. each; 2/- dozen.

ALOCASIA

PLANT ALL YEAR ROUND

POSTAGE EXTRA

Macrorrhiza—Spoon or Green Scented Lily, 1/6 each

ALSTROEMERIA

(Peruvian Lily)

PLANT FEBRUARY TO JUNE

POST FREE

For supplying flowers during the Summer months there is nothing to equal them, either for beauty or lasting qualities. Free blooming and of easy culture; lasts well when cut. Plant six inches deep in loamy soil.

AUREA. Yellow, 10d. each; 8/- dozen.

AURANTIACA. Brown, golden, orange. 10d. each; 8/- dozen.

PSITTACINA (Parrot Flower). Red and green. 10d. each; 8/- dozen.

CHOICE MIXED. 8d. each; 6/6 dozen.

AMARYLLIS

PLANT OCTOBER TO MARCH

POSTAGE EXTRA

Will do well under any good garden conditions, but responds best to deep well-drained soil, a sunny situation and plenty of water during the flowering season. Do not cut the foliage away until it has died back. Plant about 7 inches deep in heavy soil, 9 inches in light loam.

BELLADONNA. This splendid species is very variable in size and colour, producing variously-shaded flowers from almost white to the deepest pink; they thrive best in light soil. 6d. each; 4/- dozen.

BELLADONNA PERFECTA. Various shades of pink; tall. 9d. each; 7/6 dozen.

FORMOSISSIMA. The Jacobean Lily (see Sprekelia).
STERNBERGIA LUTEA. (See Sternbergia).

For HIPPEASTRUMS—See page 7.

ANOMATHECA

(Red Freesia)

PLANT FEBRUARY TO MAY

POST FREE

CRUENTA. Dainty blooms, resembling a scarlet Freesia, are produced in profusion in mid-summer. Will do equally well in shade or full sunshine. Plant about 2 inches deep. Prefers a fairly firm soil. 3d. each ; 2/6 dozen ; 17/6 100.

ARUMS—See Callas, page 3.

BABIANA

PLANT FEBRUARY TO MAY

POST FREE.

Very showy plants, producing rich self-colours and very distinct hues in the same flower, with ribbon-like foliage, plant about 2 inches deep. Sweetly scented.

ALBA. Clear white. 3d. each ; 2/- dozen.

AZUREA. Dark purple.

MODESTY. White and mauve.

SPLENDENS. Deep red ; white centre.

STRICTA. Blue.

FINEST MIXED. Including beautiful red shades. 1/3 dozen ; 7/6 100.

ANEMONE

(See illustration at right)

PLANT FEBRUARY TO MAY

POST FREE

Anemones are easily cultivated—any good garden soil will grow them well. When making the beds, dig deeply a few weeks before planting and incorporate a little bone dust. On no account use stable or dairy manure or quick acting fertilisers. A light dressing of lime on top of the soil should be left a week or two before being cultivated in. Bring soil to nice, easily handled texture and water freely a day or two before planting. Look for the crown on each tuber (usually the roughened side) and plant this uppermost, setting the tubers 6-inches apart and 1 to 1½ inches deep according to size.

During growing period, water two or three times a week, but when in bud water daily. Given this treatment, Anemones respond wonderfully, giving splendid flowers over a very long period.

FULGENS MULTIPETALA. Richest flaming scarlet, the double row of wide glistening petals giving a particularly fine effect which is further enhanced by the deep purple-black central boss. 4d. each ; 3/6 dozen. See illustration on front page and Special Offer, Inside Front Cover.

ST. BRIGID. Very large, mostly semi-double flowers ; in all the most brilliant shades and colours. 1/6 dozen ; 10/- 100.

SINGLE (Australian Crown). This strain is uncommonly fine, and embraces every shade of colour ; produces flowers much larger than the common single Anemone. 1/- dozen ; 7/- 100.

SCARLET EMPEROR. A lovely clear shade ; very large flowers on long stems ; splendid for decorative purposes. 1/6 dozen ; 10/- 100.

BEGONIAS

(Tuberous-Rooted)

PLANT JULY TO SEPTEMBER

POST FREE

BASKET BEGONIAS are light, graceful and very free flowering. Their popularity is increasing every year. All who have grown them speak in praise of this wonderful flowering plant. Plant 3 tubers to 10-inch basket, 4 to 12-inch basket ; cover the tubers very lightly and water sparingly until they make growth. Look for crown on top of tuber when planting, and plant rounded side down.

BASKET BEGONIAS } 1/6 each ;

DOUBLE BEGONIAS } 15/- dozen.

SINGLE CRESTED BEGONIAS. 1/3 each ; 12/- doz.

The above varieties can be supplied in separate colours (Pink, Red, White, Salmon, Yellow, etc.) or **Choice Mixed.**

BILLBERGIA

PLANT ALL THE YEAR ROUND

POSTAGE EXTRA

NUTANS. The narrow leaves, about one foot long, are bright green on the upper surface and finely striped underneath. The flowers are characterised by a drooping or nodding inflorescence, hanging gracefully from a bright cerise bract-like stem. The petals are green, with a blue edge, giving the plant when in flower a very striking appearance. It thrives well in hot and dry sunny positions in poor or rich soil, in hollow logs and pots or drain pipes. 1/- ea. ; 9/- doz.

BRODIAEA

PLANT FEBRUARY TO APRIL

POST FREE

Pretty tubular flowers, borne in clusters on stems up to one foot. Plant 2 to 3 inches deep. Any good garden soil will produce fine flowers. Colours : Blue, yellow, scarlet, white and purple. Hardy. Mixed bulbs only. 3d. each ; 2/6 dozen.

BRUNSVIGIA

PLANT FEBRUARY TO MAY

POSTAGE EXTRA

This magnificent border plant forms a handsome crown of flowers on a stem of about 3 ft., containing from 18 to 24 separate blooms with a delightful perfume. They prefer a warm, sunny, well-drained situation. Be careful to plant with the top of the bulb above the surface of the soil.

One of each named variety for 14/-, postage extra 1/6.
HARBORD HYBRID. The best pure white 5/- each
HATHOR. White, exceptional merit..... 4/6 each
MULTIFLORA. Large pink 1/6 each
ORVIETO. Very deep shade of pink..... 2/- each
PALLIDA. White 1/6 each
ROSEA. Pale pink 1/6 each

CALLA

PLANT APRIL TO SEPTEMBER

POSTAGE EXTRA

The Callas grow best in deep, rich sandy soils, and require a good supply of water during Summer. They make splendid tub plants.

They require to be planted 4 inches deep in heavy soil ; 5 to 6 inches in light loam.

One of each variety (value 22/-) for 18/6 post extra.
 The Spotted-leaved varieties make exceptionally good pot plants.

ADLAMI. Cream, large violet centre. 2/- each.
AETHIOPICA (Arum Lily). The Old Nile Lily. 9d. each ; 7/6 dozen. Plant at any time.

AURATA (Arum). Lemon-yellow, jet black centre. 1/- each.

CHROMETELLA. Yellow, large violet blotch. 2/- ea.
ELLIOTTIANA (Golden Arum Lily). Leaves evenly spotted and marked. The spathe is a very rich pure yellow. One of the most beautiful Callas. 1/6 each ; 16/- dozen.

ITALICUM (Arum). Greenish white, with variegated foliage. 1/- each.

LITTLE GEM. Small white flowers ; dwarf growing. 1/- each.

MACULATA ALBA. Spotted leaves, creamy white flowers ; make a pretty pot plant. 9d. each ; 7/6 doz.

MRS. ROOSEVELT. Pale yellow ; very fine. Spotted leaves. 1/6 each.

NELSONI. Large cream flowers ; spotted foliage. 2/- each.

REHMANII. Quite distinct delicate shade of rose ; very handsome. 2/- each.

REHMANII VIOLACEA. Violet shade. 3/6 each.
SANTUM. The wonderful black Calla. This magnificent variety has the habit and foliage of the white Arum Lily ; the flowers are of the richest velvety black colour imaginable. 2/- each.

SOLFATAIRE. Spotted leaves ; flowers primrose yellow. 1/- each ; 10/- dozen.

CHIONODOXA

PLANT FEBRUARY TO MAY

POST FREE

SARDENSIS. Rich gentian-blue flowers with very small white eye, making a strong contrasting note. Requires deep rich well-drained soil in a shaded situation, and is best left undisturbed for several years. Plant 3 inches deep. See illustration front cover and Special Offer, inside front cover. 6d. each ; 5/- dozen.

CHLIDANTHUS

PLANT APRIL TO JULY

POST FREE

FRAGRANS. Sweetly perfumed yellow lily-like flowers, sometimes referred to as Summer Daffodils, held 9 inches high. They respond either to full sun or shade and prefer a fairly well manured soil. 1/- each ; 10/- dozen.

CLIVIA

PLANT JANUARY TO JUNE

POSTAGE EXTRA

NOBILIS AND NOBILIS HYBRIDS. Evergreen bulbous plants growing 18 inches high, producing in early Summer, large heads of handsome tubular orange-yellow flowers. They are easily cultivated, and thrive in almost any situation, shade or sun provided the soil is deep and rich. Clivias are very suitable for pot or tub culture, either in a bush house or on a verandah. 3/6 each.

CRINUM

PLANT ALL YEAR ROUND

POSTAGE EXTRA

Handsome flowering bulbous plants. They thrive in deep rich soil, and require little attention in their cultivation. The large funnel-shaped flowers are borne in clusters at the top of tall stems well above the foliage.

CAPENSE. White with pink stripe 1/6 each

MOOREI. Beautiful pink 1/6 each

PEDUNCULATUM. Giant white, narrow

petals 1/- each

POWELLII ALBA (Purity). White, very fine 1/6 each

POWELLII ROSEA. Rose pink 2/- each

UMBELLATUM. Pink shaded, large 2/6 each

YEMENSE. Beautiful, fragrant, and large satin-white flowers 3/- each

One of each variety, value 13/-, for 11/-, postage extra.

CROCUS

PLANT FEBRUARY TO MAY

POST FREE

Old English favourite, but only suitable to the colder districts. If the situation and climate are suitable, no special care is necessary ; will thrive in poorest soils. Plant 2 inches deep and leave undisturbed for a few years if possible.

BLUE, YELLOW, WHITE, STRIPED and CHOICE MIXED. 3d. each ; 2/6 dozen ; 17/6 100.

CYRTANTHUS

PLANT FEBRUARY TO MAY

POST FREE

A beautiful dwarf-growing Cape Bulb which flowers from the late Summer to Autumn. Very free flowering, and sweetly perfumed. Should be left undisturbed for several years. Very hardy ; will grow successfully in any good garden soil. Suitable for pot work.

HERMOINE. Apricot 1/6 each ; 16/- doz.

LUTESCENS. Yellow..... 1/- each ; 11/- doz.

McKENNI. Clear white 1/6 each ; 16/- doz.

ROSEUS. Pink 1/6 each ; 16/- doz.

SANGUINEUS. Carmine red.. 1/6 each ; 16/- doz.

POSTAGE EXTRA

Beautiful hardy border plants which thrive under very ordinary treatment in any garden soil. Six shades of orange, yellow and bronze. 1/- each. Six varieties for 5/6.

HIPPEASTRUM

(Australian-Raised Hybrids)

PLANT JANUARY TO MAY

POSTAGE EXTRA

It is impossible to name a more magnificent genus of bulbous plants than these. Under the simplest conditions of culture they throw up spikes of from two to three feet high, surmounted by immense trumpet-shaped blooms. Hippeastrums are truly astounding in their immense blooms, wealth of colouring and regal habit. When planting, leave neck of bulb showing above the soil.

MIXED HYBRIDS. A splendid assortment. 2/- each; 20/- dozen.

AUSTRALIAN NAMED HYBRIDS. 3/6, 5/- and 7/6 each. (List on application).

AMARYLLIS VARIETIES—See page 1.

HYACINTHS

For growing in Pots in our Special Bulb Fibre and in the open ground.

PLANT FEBRUARY TO MAY

POST FREE ON ALL VARIETIES.

BEDDING HYACINTHS

Hyacinths growing in beds make a wonderful show planted either in masses or in clumps. Our Superb Mixture contains a wide range of colours, and will give a beautiful effect.

SUPERB MIXTURE, includes all shades. 9d. each ; 7/6 dozen ; 55/- 100.

DOUBLE HYACINTHS

These delightful bulbs with their richly perfumed colourful blooms require a sheltered situation preferably with an easterly aspect, and some protection from winds. Well decayed cow manure should be thoroughly worked through the soil and the bulbs planted 2 to 4 inches deep according to the size of the bulb.

For growing in Pots in our Special Bulb Fibre and in the open ground. 1/3 each ; 13/- dozen.

PLANT FEBRUARY TO MAY

POSTAGE EXTRA EXCEPT WHERE OTHERWISE STATED

COLLECTIONS OF JAPANESE IRIS

GIANT DOUBLE. One each of 18 varieties for 22/6 post free.

SINGLE. One each of 18 varieties for 15/- post free.

IRIS KAEMPFERI

JAPANESE IRIS—(Iris Kaempferi)

For size and richness of colour, the Japanese Irises are unequalled. The indescribably beautiful flowers of mauve, white blue veined, purple, bronze, pink, violet red, lavender, blue and silver are often six to eight inches across, and are held on stems 3 ft. high. They do quite well in the flower border when planted in light, rich soil with attention given to watering when in growth. Planted at the edge of ponds or streams, no plants can excel these for making an unforgettable display of colour. They are not lovers of lime.

JAPANESE IRIS. Mixed Double and Single (Unnamed). 6/6 dozen ; 45/- 100. Post or Carriage Extra.

Giant Double

1/6 each ; 15/- dozen. Postage extra.

AMETHYST. Blue and white.
BEAUTY. Pink netted and wine striped.
BLACK PRINCE. Black, purple shade.
CLOISSONE. Wine purple on a white ground.
DUCHESS. Mauve pink, wine shaded and striped.
EMBLEM. Deep purple ; mauve stripe ; yellow centre.
EMPEROR. Light purple.
EXQUISITE. Blue shade, lined purple.
GOBLIN. Pale blue and mauve, yellow blotch.

ICICLE. White ; large.
JEWEL. Lavender purple, lined white.
MAUVEEN. Mauve lined faint purple.
PRESIDENT. White, blue veined.
SPLENDENS. Freckled purple and blue.
THE DUKE. Purple and blue, yellow centre.
VIOLET. Violet red shade.
VULCAN. Bronze purple.
ZULU. Blue black shade.

This section of Iris is hardy, and will grow in almost any soil or situation. All are free-flowering, and like a proportion of slaked lime in the soil. A sunny situation protected from wind is best.

IMPERATOR. A new hybrid Iris. Flower standards lavender purple ; falls azure blue ; yellow blotch. Early flowering, and extra good for cutting. 3/- dozen ; 20/- 100. Post free.

JAPONICA. A lovely Iris, bearing on slender stems lilac flowers, fringed standards and falls spotted yellow. Very hardy. 1/- each ; 10/- dozen.

OCHROLEUCA (Gigantea). Magnificent species, tall growing and robust ; large flowers of ivory whiteness ; orange and yellow base. 1/3 each.

OCHROLEUCA AUREA. Deep rich golden yellow. A most attractive form. 2/- each.

OCHROLEUCA SULPHUREA. Yellow blooms and tall stems ; very good. 1/6 each.

PSEUDO ACORIS (Golden Water Iris). Needs swampy ground. 1/6 each.

SIBERICA. Gentian Blue ; very fine ; lasts well when cut. 1/- each.

STYLOSA. Fine foliage, loveliest pale blue, golden bands and blotches, scented. 9d. each ; 8/- dozen.

STYLOSA SPECIOSA. Blue. 1/- each ; 11/- dozen.

STYLOSA ALBA. Pure white ; large flower—a gem. 9d. each ; 8/- dozen.

All three varieties of *Stylosa* are Winter Flowering.

SUSIANA (The Mourning Iris). Plant tubers about one inch deep. Likes light soil and ample quantities of lime, a sunny aspect, and good drainage. Flowers large, with winged petals surrounding those enclosing the centre of the flower. Ground colour pale grey, lined and veined with dark brown, resembling tracery of the finest lace. 2/6 each.

TUBEROSA (Snakeshead Iris). Flowers rich velvety violet, black and green. A remarkable, curious and handsome flower. 1/- each.

PLANT APRIL TO SEPTEMBER—Postage Extra

Large Single Flowered

1/- each ; 10/- dozen. Postage extra.

BRONZEWING. Bronze and violet shade.

Any 6 for 5/-. Postage Extra.

Choose from the selection above.

Kniphofia make a truly magnificent display in a sunny border. The flowering season is long, and the blooms are outstandingly beautiful for house decoration.

LILIUMS

PLANT MARCH TO AUGUST

Postage 6d. each; 1/6 dozen.

(Interstate, 2/6 dozen.)

We are offering locally-grown, acclimatised Bulbs of the following varieties, amongst which are some of the finest Japanese kinds.

In choosing a position for these bulbs, it is well to remember that their growing period is during the winter, when they require all the sunshine and warmth they can get, and their flowering period in the hotter months; when they naturally need a fair amount of protection. They require a soil that is not too heavy; therefore, sand should be introduced as well as rotted leaf mould. Use sand in planting the bulbs, which should be about six inches under the soil. If grown in a bed, about twelve inches would be the right distance apart.

(Right) **LILIUM SPECIOSUM RUBRUM**

The varieties as follow are offered subject to crop ;

AURATUM (Golden Rayed Lily of Japan). The finest of all Liliiums. The blooms are produced freely, and are an ivory white ground colour, studded with brownish-red spots, and with a distinct yellow band through each petal. The blooms are very fragrant. We offer large, acclimatised bulbs at 3/6 each; 40/- dozen.

CANDIDUM (Madonna Lily). Snow-white, sweetly scented. 1/- each; 11/- dozen.

HENRYII. Apricot yellow with darker markings on each petal. Flowers in great profusion. Very hardy. 1/3 each; 13/- dozen.

LONGIFLORUM. The well-known white November Lily. 9d. each; 7/6 dozen.

PARDILINUM (Leopard Lily). Rich scarlet and yellow, spotted with brown. Flowers hang from tall stems. 1/- each; 11/- dozen.

REGALE. Without doubt the finest of all garden Lilies. Its slender stems, each from two to five feet tall, flexible and tense as steel, are crowned with one, two or three large funnel-shaped flowers more or less wine-coloured without, pure white and lustrous on the face, clear canary yellow within the tube, and each stamen filament tipped with a golden anther. This Lily has a magnificent constitution; moreover it does well anywhere. 1/6 each; 16/- dozen.

SARGENTIAE. This Lily may be described as coming between Regale and Sulphureum in its general characteristics, blooming about three weeks later than the former and usually over before the latter. The flowers are funnel-shaped; milk white internally with a golden yellow throat, and externally a deep reddish-brown. It is very floriferous, strong growing and delightfully fragrant. Well cultivated plants stand about five feet high. 2/6 each; 22/6 dozen.

SPECIOSUM ALBUM. Lovely blooms for cutting; reflexed petals; pure white flowers; chocolate coloured anthers; sweetly scented. 2/- each; 22/- dozen.

SPECIOSUM. Pink with deep crimson-purple spots. 1/6 each; 16/- dozen.

SPECIOSUM RUBRUM. Delightful shade of rose pink with dark spots. Beautifully reflexed blooms. 1/6 each; 16/- dozen.

SULPHUR-GALE HYBRIDS. A beautiful race of hybrids obtained by crossing Liliium Sulphureum and Liliium Regale. The flowers resemble those of Liliium Regale in shape, while the characteristic long bud of Liliium Sulphureum is evident; in many there is more yellow than in Regale, and in some this colour is almost absent or represented by a slight green stain. A very vigorous grower, reaching 6 to 8 feet in height, and bearing 10 to 40 blooms. 2/- each.

SULPHUREUM. A beautiful species from Upper Burma, with large, fragrant, funnel-shaped flowers; pale sulphur yellow, deepening at the throat and tinged outside with claret red; generally two or three flowers on a stem. Likes a little shelter. 3/- each.

TENUIFOLIUM. A charming early flowering Lily with strongly recurved petals of waxy texture of deep coral scarlet. Likes a cool situation and deep loamy soil. 1/6 each; 16/- dozen.

TIGRINUM SINGLE. The well-known Tiger Lily. Beautiful orange, spotted with black. 1/- each; 11/- dozen.

TIGRINUM DOUBLE. Same as above, but double flowers. 1/- each; 11/- dozen.

Often we can supply other varieties in limited quantities. Ask us about them if you are interested.

We often have during the season smaller bulbs at lower prices. However, those offered above are all good, flowering size bulbs.

The publication of this list automatically cancels all other price lists and catalogues previously published in connection with Bulbs.

CALATHINA (Sea Daffodil). Pearly white and fringed. 1/3 each.

LITTORALIS (Hymenocallis). Pure white, very beautiful. 1/- each.

MARITIMUM. White flowers, compact habit. 1/6 each.

SULPHUR QUEEN. Yellow. 3/- each.

POLYGONATUM

PLANT JUNE TO AUGUST.
POSTAGE EXTRA

SOLOMON SEAL. Likes a cool shady spot with deep rich soil. The foliage is like a flock of birds in flight, while quaint green-white flowers hang under the main stem. 1/- each, 11/- dozen.

Ranunculus

PLANT FEBRUARY TO MAY
POST FREE

These magnificent plants embrace an endless variety of colours, and produce single, semi-double and double flowers. Excellent for massing; in beds or borders the effect is gorgeous. They like fairly light, deep, well-worked soil, but will give a good account of themselves in almost any ground that is well dug and properly drained. Plant the bulbs 4 to 6 inches apart, **claws downwards**, covering with about 1 inch of light soil.

We have the following types, the colours being mixed in each case:—

ANDERSON'S SUPER MIXTURE. Blooms of largest size, perfect form and richest colourings. In our opinion the very best mixture ever sent out. Mostly doubles over a particularly fine colour range. 1/6 dozen, 10/- 100.

MAGNIFICA. Blooms are of enormous size, and colour range most extensive, many new shades being present. A very large percentage are double. 1/- dozen, 7/- 100.

TURBAN. Mixed double blooms of great size and vivid colours. 1/3 dozen, 7/6 100.

PERSIAN. Mixed double and semi-double blooms. 1/3 dozen, 7/6 100.

FRENCH. Mixed double, semi-double, and single blooms of great beauty. 1/3 dozen, 7/6 100.

Special Offer j 12 of each class for 5/3. Post Free.

ROMULEA

PLANT FEBRUARY TO MAY
POST FREE

BULBOCODIUM. Crocus-like blooms of true lavender-mauve with soft gold throat and creamy stamens. A native of South Africa, it will withstand hot weather but prefers a fairly deep, well-worked soil. See illustration front cover, and Special Offer, inside front cover. 6d. each; 5/- dozen.

SCHIZOSTYLIS (Kaffir Lily)

PLANT APRIL TO AUGUST
POSTAGE EXTRA

Dainty Gladiolus-like flowers, borne very freely throughout summer and autumn. Any light garden soil suits them well.

COCCINEA. Red. 9d. each; 7/6 dozen.

MRS. HEGARTY. Deep rose pink. 1/- each; 10/- dozen.

SCILLA

(Wood Hyacinth)
PLANT FEBRUARY TO MAY
POST FREE

These bulbs like a deep, cool, peaty soil in a shady situation.

CAMPANULATA. Blue, on tall spikes. 3d. each; 2/- dozen; 15/- 100.

CAMPANULATA ALBA. Spikes of pure white flowers. 3d. each; 2/- dozen; 15/- 100.

CAMPANULATA ROSEA. Pink, 4d. each; 3/6 dozen.

CAMPANULATA MIXED. 2/- dozen; 14/- 100.

PERUVIANA BLUE. Pyramidal spikes of blue flowers, with bright yellow anthers; handsome for bedding or borders. 1/- each; 10/6 dozen.

PERUVIANA WHITE. Large fine white variety of above. 1/- each; 10/6 dozen.

SNOWFLAKE

PLANT FEBRUARY TO MAY
POSTAGE EXTRA

GIANT SNOWFLAKE (Pulchellum). Produces elegant drooping white flowers; very large bells standing well above the foliage. 3d. each; 1/6 dozen; 10/6 100.

SPARAXIS

PLANT FEBRUARY TO MAY
POST FREE

PULCHERRIMA (Dierama). Very beautiful species, known as "Fairy Bells"; produces stems 3 to 4 feet long, with pendulous pink bell-shaped flowers. Plant 2 inches deep. 6d. each; 5/- dozen.

PULCHERRIMA MOONLIGHT. Pale rosy white. 1/6 each.

MIXED. For their refined colour and graceful habit Sparaxis never fail to win admiration. They are of easy culture. 1/3 dozen; 7/6 100.

SPREKELIA

FORMOSISSIMA. The Jacobean Lily. These showy plants produce beautiful, brilliant crimson flowers of most unusual formation. Ideal for a hot sunny border and responding generously to deep, well-worked soil. 1/6 each.

Are you on our Mailing List for all publications? Our illustrated General Catalogue ready now—Free and Post Free.

THE SWEETLY-PERFUMED TUBEROSE

BULB COLLECTIONS

See the Inside Front Cover of this booklet for VERY SPECIAL VALUES.

STERNBERGIA

LUTEA. The Yellow Autumn Crocus bears dainty little blooms with narrow quilled green leaves. Though it likes a deep soil with plenty of thoroughly decayed cow or stable manure worked through, it will respond to any good garden soil, provided it is not too sandy. Plant 3 to 4 inches deep. 6d. each; 5/- dozen.

STREPTANTHERA

PLANT FEBRUARY TO MAY
POST FREE

CUPREA. The Tangerine Flower. Dainty cup-shaped blooms of bright tangerine, something like a Tritonia with dark purple-brown markings. Very hardy and attractive. Likes an open situation and deep soil. See illustration on front cover and Special Offer, inside front cover. 6d. each; 5/- dozen.

TIGRIDIA

PLANT JULY TO AUGUST
POST FREE

Gorgeous coloured Summer-flowering plants for sunny borders. They grow about 1 foot in height, producing in rapid succession a number of large, erect flowers, having three large petals and three smaller ones, with a centre invariably beautifully spotted and marked crimson or yellow. Plant 3 inches deep.

GRANDIFLORA ALBA. White. 1/- each.

LUTEA. Yellow, with dark centre markings. 1/- each.

PAVONIA. Flowers large, orange-red, flamed scarlet. 6d. each; 4/6 dozen.

MIXED COLOURS. 6d. each; 4/6 dozen.

TRITONIA

PLANT APRIL TO JUNE
POST FREE

These in appearance are not unlike miniature Gladioli; the colours are soft and very pleasing. Free flowering and easily cultivated, and should be planted 2 inches deep.

CROCATA. Orange, dark markings. 1/6 dozen; 10/- 100.

LINEATA. Salmon red. 1/6 dozen; 10/- 100.

ROSEA. Rose pink. 1/6 dozen; 10/- 100.

MIXED. Choice range of colours. 1/3 dozen; 7/6 100.

TUBEROSE

PLANT MAY TO AUGUST
POSTAGE EXTRA

One of the most beautiful Summer-growing bulbs in cultivation; the blooms are of the purest white, and of the most exquisite fragrance. They are admirably adapted for bouquet-making, and they are easy to cultivate.

DOUBLE OR SINGLE. Clumps. 6d. each; 5/6 dozen.

WATSONIA

PLANT FEBRUARY TO MAY

POSTAGE EXTRA

Splendid for cutting and table decoration, and last a long time in water.

ADELAIDE. Distinct orange scarlet. 6d. each; 5/- dozen.

AVALON. Pale pink, mauve and salmon shaded. 6d. each; 5/- dozen.

BEAUTY. Delicate pale pink. 3d. each; 2/- dozen.

COCCINEA. Orange red. 3d. each; 2/- dozen.

LADY FAWKES. A charming new creation of pure deep salmon colour. 6d. each; 5/- dozen.

MAUVEEN. Tall growing, deep mauve. 6d. each; 5/- dozen.

MAITLAND. Large crushed strawberry shade; late. 6d. each; 5/- dozen.

MELBOURNE. Buff salmon shade. 6d. each; 4/- dozen.

NARRABEEN. Deep salmon shaded. 6d. each; 5/- dozen.

O'BRIENI ALBA. Lovely pure white. 2d. each; 1/- dozen.

PINK PERFECTION. Charming pale pink. 4d. each; 3/6 dozen.

ROSE HOLLOWAY. Delicate pink. 6d. each; 5/- dozen.

ROSEA. A beautiful shade of rosy red. 2d. each; 1/- dozen.

SALMONETTE. Large, pale salmon. 6d. each; 5/- dozen.

SYDNEY. Ruby magenta shade. 6d. each; 5/- dozen.

MIXED HYBRIDS. New colours, all shades. 4d. each; 3/- dozen.

1 each, 15 varieties, for 4/6,
postage extra.

TULIPS

TIME OF PLANTING: FEBRUARY TO JUNE

POST FREE

Situation: A warm, sheltered N.E. aspect is the ideal one, but **TULIPS** are very accommodating in any but windy spots.

Soil: Any but a light sandy soil will give good results provided it is well worked to at least 15 inches, and has large amounts of lime worked right through the bed. After planting, dress heavily with lime, and again about June. The more lime you can give the better the results, but drainage must be good. Never use fresh manure. Bone dust is helpful.

Planting: Tulips do best when grown in beds by themselves. Place bulbs 6 inches apart, 6 inches between rows and 6 inches deep. Shallow planting leads to breaks in colouring and to splitting up of the bulbs. They require a fair amount of moisture and beds should never be allowed to dry out. If planted in clumps try them in sixes—five spaced round the circumference of a circle 12 inches in diameter and one in the centre.

Lifting: This should be done as soon as the foliage dies down and bulbs must be dried and stored in an airy cool spot in single layers.

DARWIN MIXED. Too much cannot be said in praise of this class of Tulip. They excel in brilliancy and perfect form of flower. Their tall stems place them in first favour as a cut flower. 6d. each; 4/6 dozen; 32/6 100.

SPECIAL NAMED TULIPS

Large, sound, flowering size bulbs, of named varieties at 6d. each; 5/- dozen; 35/- 100.

(List on application.)

VALLOTA PURPUREA

(The Scarborough Lily.)

POSTAGE EXTRA

A lovely free-flowering bulb of the Amaryllis family. The flower is trumpet-shaped, produced in clusters, and of a rich orange-scarlet; stem 18 inches. Can be supplied at any time. 1/- each; 11/- dozen.

Postage Rates;

N.S.W.: 4d. each; 1/6 dozen. Interstate: 4d. each; 2/6 dozen.

ZEPHYRANTHES

PLANT MARCH TO JULY

POST FREE

A pretty little bulbous plant, belonging to the family of Amaryllis. Very effective for edging.

CANDIDA. Pure white. 1/6 dozen; 9/- 100.

CARINATA. Large rose pink. 1/6 each.

ROSEUS. Rose, shaded white. 1/- each; 10/- dozen.

FOR GROWING in BULB FIBRE

We recommend:

Daffodils, Hyacinths, Freesias, Grape Hyacinths, Tulips, Scillas, Lachenalias. Descriptions are given throughout this book; directions on opposite page.

HINTS ON BULB CULTURE

IN THE OPEN GARDEN

BULBS will grow in almost any well-worked soil; they mostly prefer a sandy loam, but will grow in almost pure sand if this is well enriched. Strong stiff soil, however, must be thoroughly broken up, well drained and lightened by the addition of sand or vegetable matter, such as leaf mould, before it can be made suitable for planting.

Often a green crop grown on land after its preparation and dug in would greatly help to bring the soil into proper condition. After the land has been deeply dug for the reception of Bulbs, it is always better to allow it to remain for a week or two to permit the soil to settle, otherwise Bulbs may sink too deeply into the soil.

PLANTING:

When planting Bulbs, the size of the Bulb should always be taken into consideration; for instance, a Hyacinth Bulb measuring 2in. in diameter requires a covering of 2in. only, and the same may be taken generally with the planting of all others, giving them a covering of soil equal to the diameter measure of the Bulb. For late planting of Gladioli, the depth should be increased so that the Bulbs may escape the surface heat of summer. According to the varieties, planting should be done in groups, beds or rows, and the distance determined by the size of the plants when grown. The

soil must on no account be wet or sticky at the time of planting, and if at all loose should be made firm with the foot. Where it is inclined to be stiff, a little sand at the base of the Bulbs will greatly help the drainage and prevent rotting, as in many cases failure is due to too much moisture.

MANURING:

Bone-dust is one of the safest manures that can be used if well incorporated with the soil at time of planting. Most flowering Bulbs dislike ammonia and fresh stable manure; fowl-yard manure should be avoided. Well-rotted stable or cow manure which has been maturing for some considerable time can be safely used, but should be well dug in at the base of the Bulbs, and not allowed to touch them when planting. In the case of Daffodils the manure is intended to hold the moisture like a sponge, and is not intended as a fertilizer. For summer flowering Bulbs, such as Gladioli, Lilliums, Montbretias, top-dressing of old stable manure or decayed vegetable matter, placed over the surface of the soil to the depth of about 2 inches is invaluable, as it keeps the roots cool and retains the moisture in the soil. It is not necessary for early Spring flowering Bulbs; for these the soil should be kept well open with a hoe.

Bulb Culture in Bowls and Basins

WITHOUT DRAINAGE IN OUR SPECIAL BULB FIBRE

Growing Bulbs indoors is very simple, and the amount of pleasurable results obtained is unbounded.

Directions: The bulb fibre must be in a moist condition before the bulbs are planted in it. Leave the tops of the bulbs just above the surface of the fibre, make fibre firm round them, then water lightly. Place the bowls in a dark, airy cellar, cupboard or room, and examine occasionally to see that the fibre is moist, the idea being to allow the bulbs to make plenty of root before they start into growth; this should take place about eight weeks after planting.

When the bulbs have started to grow place the bowls in a room or verandah where there is plenty of light. It is a wise plan to turn the bowl a little each day; this will promote even growth.

On no account allow the fibre to become dry, as this would assuredly cause the bulb to go "blind," which means the loss of the flower. The fibre must be kept evenly moist once the bulb begins to grow. On the other hand do not saturate the fibre; if too much water has been given, tilt the bowl on one side and drain off the surplus.

LACQUERED BULB BOWLS

WEDCO POTTERY—AUSTRALIAN MANUFACTURE

In colours: **BLUE, GREEN, ORANGE, YELLOW, and BLACK.**

Prices: 2/6, 2/9, 3/3, 3/9, 4/9, 5/- each.

Every care is exercised in the packing of bowls, but we do not accept any responsibility for breakage during transit.
Packing and Carriage Extra.

ANDERSON'S SPECIAL BULB FIBRE

Our Special Bulb Fibre is moisture absorbent, and is the best fibre for the successful culture of Bulbs in Bowls.

PRICES; 4d. per lb.; 4 lbs. for 1/-; and 14 lbs. for 3/6. Carriage Extra.

Bowls ready-planted with **DAFFODILS, FREESIAS, LACHENALIAS, JONQUILS**, from 5/6.

Planted with **HYACINTHS**, from 6/6.

CHOICE FLOWERING BULBS

Hardy, suitable for the most unlikely places, thriving either in shade or sunshine provided the soil is well made up, **CLIVIA NOBILIS** is worthy of every gardener's attention.

The rich orange salmon trumpet flowers are unusual and enchantingly lovely for house decoration.
